

Lecture - 14 - CSS Grid

- `display: grid;` → Apply on parent.
- `grid-template-columns: 200px 200px 200px;`
↓
3 columns.
- `grid-template-rows: 200px 200px;` OR `repeat(2, 200px)`
↓
2 rows. ↓
repeat function

- I can also give value in fraction. Use `fr`.

`grid-template-columns: 1fr 1fr 1fr;`
↓

3 columns divided
into 3 fractions.

- `gap: 1rem;`

↘
Gap in the grid.

- `row-gap` & `column-gap` can be used as well.

- `grid-column-start: 1` & `grid-column-end: 4`

↓
(Starts with 1 & end at 4)

↓
`grid-column: 1/4;`

- `grid-row-start: 1` & `grid-row-end: 4`

↓
`grid-row: 1/4;`
