* Z-index
↓

- Follows a stack approach.
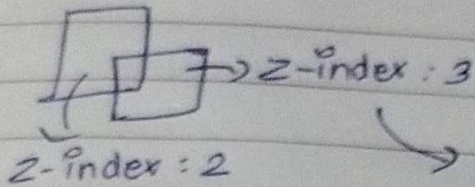

→ Z-index : 3

Z-index : 2

→ Ye wala dikhega !

- Higher the value, the more visible it is.
- Z-index is not used with position : static.
- Default z-index is auto.

* Overflow →

 } content in div
} overflow

1) By default
   overflow is Visible
2) To hide overflow content use → Overflow : hidden.
3) To overflow : scroll
   → You can scroll overflow content.

* Float & Clear.

- The float property is used to position & format content.
- It can have left, right, none, inherit properties.

   image ko   image ko
   left mei float   right mei.
                     float.

clear → Because
one image is
floated on right.
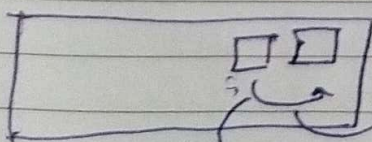

4 want
4mg, to be of
niche of upar wali image.

clear:both
